HIGH-FLOTATION
TIRES

REDUCED SOIL COMPACTION

CTX 19000 FILTER CAKE CART

It stands out for its functionality, operational performance and sturdiness. Pulled by tractors with high-flotation tires, it performs two planting rows simultaneously, furrowing operations and filter cake distribution.

TECHNICAL SPECIFICATIONS

VOLUMETRIC CAPACITY 19 m³ [670,98 ft³]

LOADING CAPACITY 20.000 kg [44092.45 lbS]

LOADING HEIGHT 3.200 mm [10.4987 ft]

TIRES OUTER WIDTH 3.600 mm [11.811 ft]

EQUIPMENT LENGTH 9.200 mm [30.1837 ft]

HIGH-FLOTATION TIRES 600 / 50 - 22.5"

SUSPENSION TANDEM

GAUGE 2.400 / 2.800 / 3.000 mm [7.874 / 9.1 864/ 9.8425 ftp]

POWER PLANTING ROW APPLICATION 230 HP

POWER FILTER CAKE APPLICATION 290 HP

MAIN ADVANTAGES

- ▶ Two furrowers with containment box.
- ▶ Suggested planting speed: 5 to 6 km/h.
- ▶ Planting spacing: 0.90 to 1.5 m [2.9 to 4.9 ft] and double alternating 0.90 to 1.6 m [2.9 to 5.2 ft].
- ▶ Depth limiting wheel: regulation as needed.
- ▶ Distribution: two steel conveyor belts driven by hydraulic engine with application adjustment.
- ▶ Coverer with adjustable arms and 4 concave discs with angle and height regulation by hydraulic cylinders.
- ▶ High-flotation tires: 600 / 50 - 22.5".
- ▶ PinBall type frontal hitch system.
- ▶ Header with hydraulic suspension system.
- ▶ Furrowers allow regulation for planting spacing, furrow's depth and width.
- ▶ Wheel set: Tandem axle system with high-flotation and low-pressure tires, which contributes to the reduction of soil compaction.
- ▶ Technical Assistance TMA.

OPTIONALS

- ▶ Moldboard plow.
- ▶ Fertilizer deposit capacity of 700 kg.
- ▶ Worm thread in surface application in 4 or 6 simultaneous row.
- ▶ Central tire inflation system.
- ▶ Oxide box with conveyor belt.
- ▶ Load and reverse monitoring kit.
- ▶ Stainless steel-coated tank.
